

INVESTMENT STYLE

The fund TBF JAPAN invests in shares of companies based in Japan. The Euro tranche of the fund is currency-hedged. Stock selection takes place via company visits on site in Japan and the database-supported TBF analysis process. It focuses on an active investment approach. ESG criteria are also integrated into the entire investment process.

RISK & INCOME PROFILE

OPPORTUNITIES

Exploiting opportunities for growth in the equities markets. When investing in assets denominated in foreign currencies, the fund unit value may be positively affected by changes in exchange rates. Hedging opportunities through the possible use of derivatives.

RISKS

Share prices may fluctuate sharply due to market conditions, and prices may fall at any time. When investing in foreign currencies, the fund's unit value may be negatively affected by changes in exchange rates. If derivatives are used, it is possible that the value of the fund will be affected more negatively than would have been the case if the assets were purchased without using derivatives. This may in turn increase the fund's risk of loss and volatility (fluctuation in value).

Please see the sales prospectus for detailed information concerning risks and opportunities.
